

OptiFlow Ultrasonic Flowmeter Specification - Page 1

Product: OptiFlow Ultrasonic Flowmeter (P012)

Manufacturer: Precision Instruments Inc (USA)

Category: Industrial Sensors

High precision transit-time ultrasonic flow meter for non-invasive liquid flow monitoring.

Technical Specifications:

- Pipe Diameter Range: DN15 to DN6000 mm
- Measurement Accuracy: $\pm 1.0\%$ of reading
- Repeatability: 0.2%
- Velocity Range: ± 32 m/s
- Output Telemetry: 4-20 mA, RS485 Modbus RTU, OCT pulse output
- Enclosure Protection: IP68 submersible transducer, IP65 transmitter unit

OptiFlow Ultrasonic Flowmeter Specification - Page 2

Power & Operational Limits:

- Power Supply: 24V DC standard or optional internal lithium backup battery
- Liquid Temperature: -30°C to 160°C
- Pipe Materials Supported: Carbon steel, stainless steel, PVC, cast iron, copper
- Warranty: 5 years manufacturer warranty covering all electronic components
